Ishan Joshi

Position: President of UNC's BOUNC Club

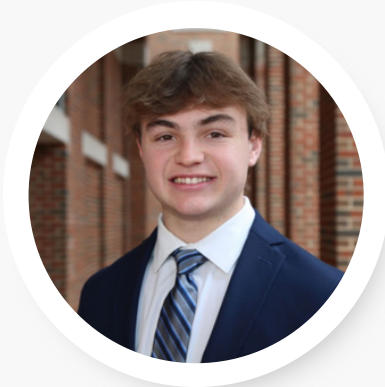

"There's no easy way for us to take attendance or track members"

Haylee Osgood

Position: President of UNC's Student Global Health club

"I can't even apply to grants because we don't know how many members are in our club"

Brian Surless

Position: President of UNC's VC Club

"Sending announcements in our club is a pain! Especially with infographics."

Problem

- Clubs can't properly track their members
- Attendance takes hours
- Dues are manually paid through Venmo
- Every announcement must be sent to 5 different places

Our Solution

Attendance

Clubs can now take attendance with the click of a button, and have all members checked in to an event. Attendance doesn't have to take 2 hours of your weekend.

Dues

Dues are now automatically paid out of members' accounts. You have subscriptions to clubs. Forget Venmo and having to chase people down.

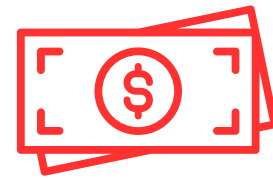

Member Management

We give clubs a seamless system to allow new members to sign up, so they can easily be traced in the system. No more thousand-cell excel spreadsheet documents.

Announcements

Send announcements to Instagram, GroupMe, Discord, and everywhere at once. Don't have to past info back and forth on different platforms

Legacy Tools

Tools like Heel-Life fail to provide some of the features of KlubSpace. However, students hate them.

Messaging Apps

GroupMe, Slack, Teams provide up to 20% of the functionality of KlubSpace. They aren't built for this use case.

Competition

Aryah Oztanir

Aryah is a passionate entrepreneur with a vision to revolutionize how organizations operate. With extensive experience in software development and a deep understanding of community needs, Aryah brings technical expertise and innovative solutions to build a new and effortless form of club management. At KlubSpace, Aryah handles much of the business-related work, and is the leader of the KlubSpace Ambassador program.

Thomas Bland

Thomas is an experienced software engineer with a passion for creating. After founding AI@UNC, UNC's biggest CS club, he realized the need for a more efficient way to manage clubs and organizations. Using the same skills and experience from building production web applications for real clients, Thomas is bringing his vision for club management software to life with a powerful, user-friendly platform designed to streamline operations, enhance engagement, and simplify club leadership.
